Getting a good quality tileable shower trays which will withstand the rigors of daily use and house movement without causing heartache in the years to come has been hard to find. We've now combined our considerable experience with acrylic shower trays to develop a 1 piece tileable shower tray with built in fall and a low step. This tray also enables the use of a std 90mm easyclean trap which helps to keep both the purchase cost and the install cost down. The Tray also reduces the time to install a tiled shower tray and does not require waterproofing on the bathroom floor. Another advantage is this design enables you to place this on an existing polished wooden floor or a 2nd floor of an existing house without the normal concerns of house movement causing leaking.
